Page 7, between lines 11 and 12, INSERT a new Finding of Fact to read:

"31. With respect to replacements, Staff has recommended that the primary focus of the program should be on replacing less efficient natural gas equipment with the most efficient gas equipment currently available¹, rather than replacing less efficient electric equipment². In a broader consideration of overall energy efficiency, however, we find that it is in the public interest to replace less efficient equipment with more efficient equipment, regardless of the form of energy used to power the less efficient equipment that is to be replaced. Therefore, we will allow the program to provide for the replacement of less-efficient electric equipment with more efficient gas-powered equipment, in addition to replacing less efficient gas-powered equipment with more efficient gas-powered equipment."

Renumber Findings of Fact to conform
